Reference: Cellular South Petition for Tower

Dear Sir,

I own a home and live at 2354 Loring Road, Camden, MS. I am writing to express my concern over the proposed site for the construction of Cellular South phone tower. I strongly believe the proposed location: 2340 Loring Road, Section 24, T11N-R4E will affect the current value of the existing nearby homes, as well as reduce the possibility of future residential development.

Loring Road is the main road leading into Camden and it is the most desirable location for future residential development that will enhance the value of the community.

Although Cellular South proposes to provide cell phone service to this area of Madison County, it should be located in an area that will not be affected by its appearance. Therefore, it should not be constructed at the proposed location.

Cellular South has approached all adjacent land owners, including myself with a proposal to install a tower in this same general area. I have the layout for the said proposal that would have been located several hundred yards from Loring Road. With this in mind there are other locations that would service this community with cellular service that would not damage the integrity and future development of properties along Loring Road.

I trust that you will be sensitive to my request and vote against the petition for the proposed cell phone tower location.

Sincerely,

John B. Brown
