

**MADISON COUNTY BOARD OF SUPERVISORS
INFORMATION TECHNOLOGY DEPARTMENT**

April 17, 2017

To the Board of Supervisors,

Subject - EMA Office Data Circuit Upgrade

The EMA office needs a data circuit upgrade due to the following:

The EMA office has a need to train various outside organizations from time to time. For security reasons this training has to occur on the public internet connection, outside of our secured internal network. The EMA location does not have public internet, nor do they have enough bandwidth to access the public internet installed in the Chancery building computer room.

A quote is attached reflecting the monthly cost of this upgraded circuit.

Duane Thompson

IT Director

Southern Telecommunications Company
