Re: Temporary Construction Easement  
Hathaway Lake Subdivision

Earlier this year, a flooding event took place within the Hathaway Lake Subdivision. The Engineering Department made the findings that the neighborhood's drainage system was originally designed to accept runoff from the neighborhood and Stribling Road. Unfortunately, the storm event overwhelmed the system which resulted in Claiborne Street being inundated with floodwaters which made the roadway nearly impassable.

As a result, the Engineering Department is recommending that a temporary construction easement be approved in order for the County to make the repairs at the intake structure for the sake of the public welfare, safety & health, and to prevent further damage to Claiborne Street.
