

SYSTEM PERMISSION FORM

A tenant in your building has ordered an AT&T service that requires a pathway be placed between the property line and the Minimum Point of Entry (MPOE) of your building to facilitate placement of a new AT&T fiber cable needed to accommodate the order. The pathway is the responsibility of the tenant to provide, however, the tenant has asked AT&T to place the pathway, with no cost to you, and AT&T is willing to do so if we have your approval. The pathway will automatically convey to owner at completion, and upgrades or maintenance will be at the owner's discretion; however, it will be placed in accordance with local standards and the area will be restored to original or better condition.

The permission we seek is for the physical structure we will be placing for your tenant only. If we do not receive permission using this form within ten (10) days, the tenant will need to hire another vendor to complete the requirements prior to AT&T delivering the service. AT&T (*Operator) will provide a scope of work prior to installation.

Date: 10/02/2017
Parties: OPERATOR (AT&T) - Mississippi
OWNER - _____
PREMISES (address) - 309 Park Dr Canton, Ms

- OWNER grants the OPERATOR the right to install conduit or innerduct from the property line to the point of initial demarcation in accordance with the sketch provided by the AT&T representative.
- OPERATOR will restore the affected area to like or better condition and will seal any wall penetrations, if applicable. If OPERATOR damages the PREMISES during the installation process, or if damages are discovered after completion, the OPERATOR shall promptly repair such damage at OPERATOR'S sole cost and expense.
- OWNER shall provide reasonable access to the PREMISES.
- This System Permission is the entire agreement between the parties respecting the matters herein and may be modified by written agreement only.
