Re: Gluckstadt Fire Station #3 (water service)

Dear Danny:

As discussed, pricing for water service is as follows:

Water impact fee - \$350.00
6-inch fire sprinkler backflow device and tap - \$4750.00
1-inch water meter (domestic) - \$655.00

The water meter and fire backflow device will be on the northerly side of Cedar Grove Lane. This will be the "point of service". Your contractor will run the domestic waterline from the meter to the building, and also the 6" fire line from the backflow device to the building. We will install/own/maintain the meter and backflow device.

If you have any questions, please don't hesitate to call.

Sincerely,

Nolan P. Williamson, P.E.
General Manager
