The Strength of Steel and the Beauty of Wood

Will steel posts withstand high winds?

Yes, if properly engineered. Steel posts are available in a wide range of weights (gauges) and strengths. PostMaster® posts are designed to withstand a 70-mph wind load (6' Privacy fence with posts spaced every 8') determined in accordance with the requirements of the 1994 Uniform Building Code for exposure "B". This is the requirement for building departments in many cities. Be sure to check your local requirements and space your posts accordingly.

- A - Cedar (4 x 4) / 49 MPH
- B - Redwood (4 x 4) / 59 MPH
- C - Tube (2-3/8 x .065) / 61 MPH
- D - Pipe (2-3/8, Sch 40) / 68 MPH
- E - PostMaster / 70 MPH

Will PostMaster rust?

PostMaster's open design keeps moisture from collecting and the heavy galvanized (zinc) coating helps prevent premature rusting. PostMaster is manufactured using a steel base material conforming to the requirements of ASTM A 653, coating designation G90 galvanized (zinc) coating.

Is PostMaster more expensive than wood posts?

Only slightly. Good quality materials, like good workmanship, always cost a little more. While the initial cost of PostMaster may be slightly more than a wood post, and often less expensive than heavy pipe posts with brackets, the cost of future maintenance outweighs the benefits of a lower initial price.

Do I have to sacrifice the look of wood?

No. PostMaster's in-line design can be easily covered or concealed with matching wood, retaining the esthetics of a wood fence. It can be finished with both sides identical - a true good neighbor fence.

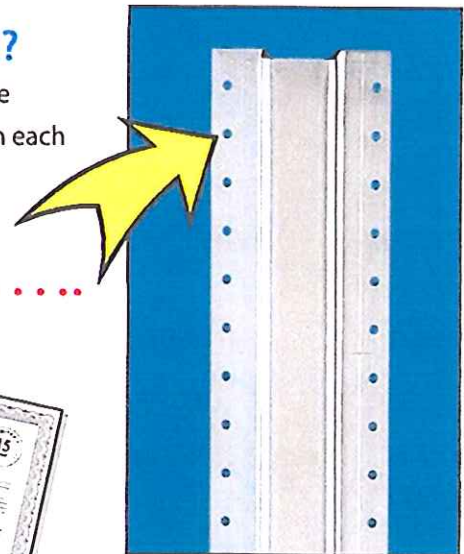

Wood fences built with steel pipe posts and brackets are unsightly because they protrude from the line of fence.

Patented

Is PostMaster hard to install?

No. Unlike most other steel posts which require brackets and/or fittings, PostMaster has pre-punched holes on each flange for attaching rails, eliminating the need for expensive brackets for most designs.

Are all product warranties the same?

A warranty is only as good as the company that stands behind it. You should understand the reputation of the company behind the warranty.

PostMaster's 15-year limited warranty is as strong as the company that stands behind it.
