RE: Madison County Board of Supervisors
MAD2017

As the insurance agent/broker of record for Madison County, Mississippi, both my client and I are not aware of the existence of any situation that may give rise to a claim or other legal action being filed against Madison County for Police Officer Liability or Law Enforcement Liability and Public Officials Liability or Employment Practices that has not already been reported to the county's current carrier. As the County's agent, I am in regular contact with my client and their employees that would likely have knowledge of existing claims of this type, as well as factual situations that could give rise to such a potential claim.
