Re: Temporary Construction Easement
114 Covey Run

The Engineering Department received a request to investigate a drainage issue at 114 Covey Run. It was determined that the inlets were blocked which caused the storm water to overflow the system. As a result, the storm water "jumped the curb" resulting in erosion that washed away the fence support.

Therefore, the Engineering Department is requesting the Board grant a Temporary Construction Easement for approximately 28' of fence to be repaired.
