

## MADISON COUNTY EMERGENCY MANAGEMENT AGENCY

The Madison County Emergency Management Agency (EMA) is requesting an additional allocation totaling \$56,253 of which \$49,530 is needed to purchase a software add-on to a system currently used by the Sheriff's Department and \$6,993 is for annual support of the software program. This purchase would be invaluable to our agency.

Official reports can be generated to track citations, traffic violations, and animal calls along with capturing such details as the time of stop, nature of the calls and other relevant information. The system also has report writing capabilities. More importantly, these reports can serve as official, supporting documentation for court subpoenas.

Currently EMA does not have a method of formally documenting the activities of County Patrol and Animal Control. To provide a means of documenting these activities, EMA would like to expand the county's use of the Sheriff's Computer Aided Dispatch system.

Thank you for your consideration of this request.

Albert Jones, III

A handwritten signature in blue ink, appearing to read "Albert Jones, III". The signature is stylized and cursive.
