Subject: Request authority to advertise for term bids for polyurethane foam applications

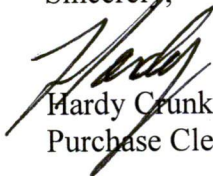

Gentlemen:

The Road Department has recently started using a new process whereby pumped-in polyurethane foam is used to fill voids in and level concrete sidewalks and curbs and seal inlets. Jimmy Vickers of Warnock Engineering has recommended this process.

I therefore request authority to advertise for term bids for the period 1 July 2013 – 30 September 2014 for a contractor to provide polyurethane foam applications.

Thank you in advance for your consideration of this request.

Sincerely,

Hardy Crunk
Purchase Clerk
