Re: E-911 Equipment

During a recent inspection of our E-911 equipment at the Canton Police Department, EMA Director Alber Jones, III and I found that the temperature in the equipment room is not satisfactory for the operation of our E-911 equipment. A small air conditioner is needed to regulate the temperature and facilitate proper operation of emergency response equipment.

I recommend that you find that installation of a small air conditioner for \$312.50 is necessary for the operation of the E-911 equipment and authorize purchase of the same.
