RE: REYNOLDS, BOBBY
DOB: 06/28/1942

To Whom It May Concern,

I am a primary treating physician for Mr. Bobby Reynolds, a 76-year-old white male, who is moving to Mississippi, after retiring from his work in Tennessee. Mr. Reynolds has many health issues, related to heart disease, lung disease, and peripheral vascular disease. Several years ago he required amputation of the right lower extremity. This does limit his overall abilities in terms of distance ambulation, etc. Mr. Reynolds needs to live and reside as close as possible to his daughter, due to his overall health conditions, which will require frequent checks by his daughter. He also needs to have limited distance between his domicile and his daughter's home, because of his previous leg amputation. I greatly appreciate your consideration of these matters.

Sincerely,

Mark W. Shelton, M.D., FACS
MWS/TS/217/8989144
