

Madison County Board of Supervisors

Friday April 3, 2020

146 West Center St.

Canton, MS 39046

Attn: Keshia Buckner

Dear Supervisors of Madison County,

Scott Equipment Company, and Volvo Construction Equipment are honored to have been chosen as the vendor for the next paver purchase for the county. With all the Covid-19 precautions and limitations production for many manufacturers has slowed down or stopped all together. As this presents many issues not only for dealers, but for customers alike we at SEC understand that there are still many customers needing to work. With the current delays in production at our Shippensburg, PA facility we have been given access to a Volvo owned demo paver. This paver will provide the county with the ability to continue repairing county roads until we have received your new paver. We are going to relocate this paver from Atlanta, GA and have it available for the county within the next week or so. We are more than happy to provide this paver at no cost to Madison County until your new paver has been delivered. We ask that in good faith the machine be cared for and maintained per Volvo manufacturers recommendations. A few things to note upon agreement of taking this loaner paver:

- Madison County will be responsible for transportation of the paver from Scott EC located in Jackson, MS. All transportation to and from jobs is also the responsibility of Madison County.
- All fuel cost and DEF fluid costs are the responsibility of Madison County during loaned period.
- Madison County will be responsible for any required services. All PM interval services recommended by Volvo manufacturers specs will be completed by a Scott technician. Based on hour usage.
- In the event the paver incurs damages from use or transportation Madison County will be responsible for repairs. If any component fails due to normal use Volvo and SEC will cover the repairs and parts.

Upon acceptance of this letter we will transfer the paver into our shop and perform a normal pre-delivery inspection of the machine. SEC will also provide up to 2 technicians to be available for onsite training once the paver is delivered. During the loaned time Scott team members will be available for support and service. I have provided contact information for myself and our service manager Paul Lanford below.

Thank you for the business, and we look forward to helping Madison County with any future equipment needs.

Sincerely,

Morgan McNeely – 601-953-1506

Paul Lanford – 601-373-4600
