Shelton,

1. If a vendor cuts grass and performs manual or mechanical weed control, a license is not required.
2. If that same vendor prunes and trims shrubbery and plants, a license is not required as long as they don't advertise as a licensed, bonded, or insured tree surgeon.

Thanks,

Russell Kohler

Russell,

In our conversation with Michael Ledlow, I asked a couple of questions. I would like to confirm the answer to my questions.

1. If a vendor cuts grass and performs manual or mechanical weed control (that is, weed control by hand, hand tool, or motorized weed eater), is a permit of any type required?

2. If that same vendor prunes and trims shrubbery and plants, does that additional service require any type of permit?

**Thanks,  
Shelton**
