Re: 19140B Madison County Annex Exterior Repairs  
**Proposed Change Request 3: Fiberglass Column Repair**

Paul,

The cost to complete the fiberglass column repairs to the three most easternly located columns on the south side of the building as discussed today will be five hundred dollars (\$500). The repair work involves using foam backer and bondo to fill-in the gaps between the fiberglass column cover and the newly installed drywall ceiling. All other columns will be caulked according to the contract documents. If this additional work is paid for through the owner's contingency allowance, there will be no additional markup.

As we are wrapping up work at the project, please let us know as soon as possible if this change is approved so we can complete the work while the painter is still on site. If you have any questions, give me a call.

Thanks,

David England
