April 26, 2024

Dear Supervisors,

My trip to inspect the 2002 Heavy Rescue Truck located in Wappingers Falls, NY, took place April 16<sup>th</sup> through April 18<sup>th</sup>. The Heavy Rescue showed very little signs of its age and it was also in excellent mechanical condition. The PTO Generator, the Light Tower, the Air Tank Cascade System, and the Extrication Tools (Jaws) all worked as required. The engine started right up and idled just like a new truck. The truck drove very well with no problems detected. The 2002 Heavy Rescue PASSED my full inspection and approval and I highly recommend that the County continues the process in purchasing the Heavy Rescue Truck.

Respectfully,

Minor Norman  
Fire Coordinator
