# **Stribling Road Improvements**

Madison County, Mississippi

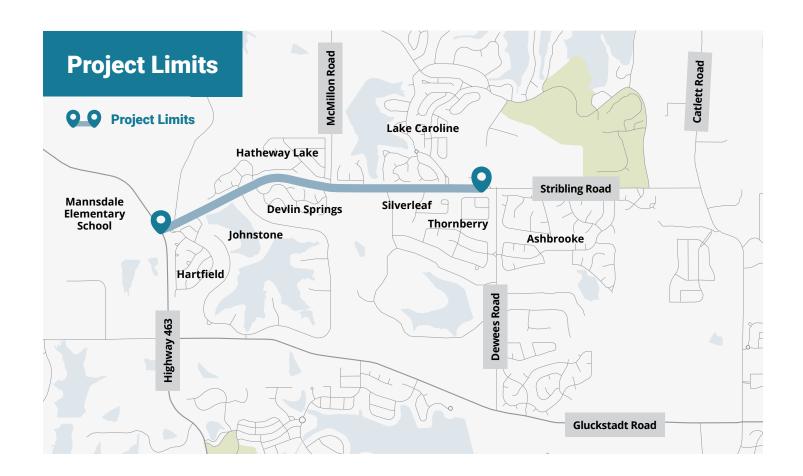

## PROJECT MANAGER **Shannon Wells, PE, PS**

1076 Highland Colony Parkway Suite 325 Ridgeland, MS 39157 601-941-3252

## **Project Description**

**Stribling Road Improvements from** Highway 463 to Dewees Road

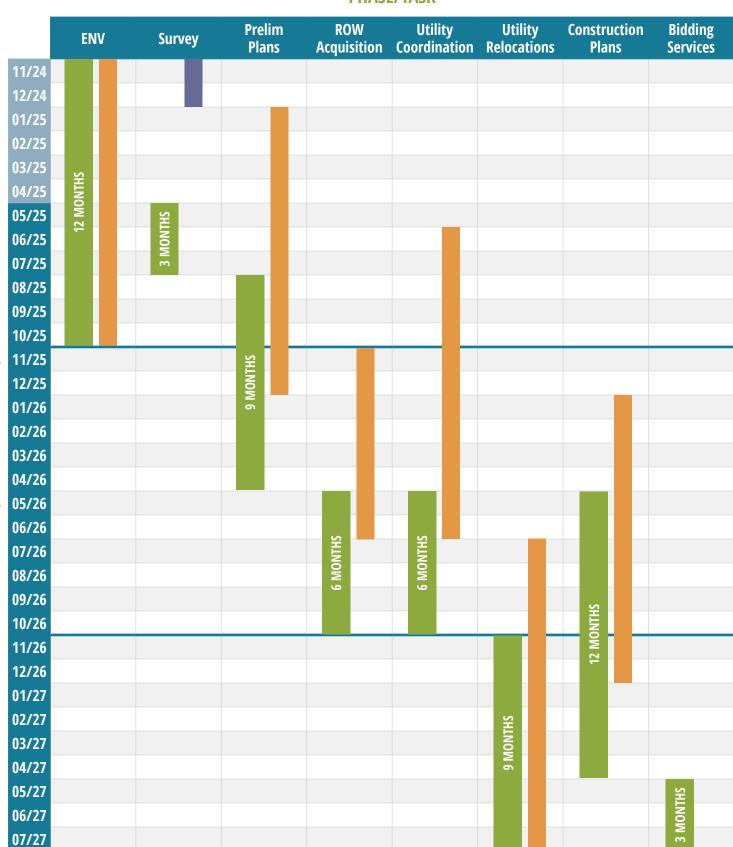

## **Project Design Schedule**

Original Preliminary Schedule
Updated Schedule (April 21, 2025)
Substantially Complete

#### PHASE/TASK

# **Stribling Road Improvements**

April 21, 2025 Update

### **Progress to Date**

#### **■** Environmental

 Report is substantially complete, awaiting completion of updated preliminary roadway design information **Stribling Road (Highway 463 to Dewees Road)** 

Contract Value: \$803,000

Contract NTP: November 4, 2024 Amount Invoiced to Date: \$267,484.04

- o Cultural resources survey completed no adverse impacts due to project
- Utilities: Existing utilities have been marked and surveyed. In-person meetings with utility companies have been scheduled over the next couple of weeks to discuss impacts and schedule for relocation.
- Traffic Analysis: Traffic model supports a 5-lane section east of McMillon Road and a 3-lane section west of McMillon Road. Intersection improvements (i.e. traffic signal, roundabout) at Camden Crossing are warranted based on post-project conditions.
- Roadway: Embankment footprint and construction limits have been developed for the project length including the updated 3-lane section
- **Geotechnical:** Draft report has been completed and indicates unsuitable material (i.e. Yazoo clay, soft material) present throughout the entire segment east of McMillon Road. Unsuitable material is present in isolated locations west of McMillon Road.
- ROW: Preliminary design progress indicates approximately +/- 35 parcels affected, based on a curb and gutter section throughout. This does not include utility easements for relocation(s). +/- 55 parcels would be affected for an open ditch section.

## **Anticipated 3-Month Projection of Work**

#### Environmental

- Wetlands: Submit wetlands report to USACE
- o Cultural: Complete report and to submit to MDAH

### **■** Utilities:

- Hold coordination meetings and develop schedules for relocation
- Begin permitting process for gas pipeline crossing
- Traffic Analysis: Complete report, including a recommendation for intersection improvements at Camden Crossing
- Geotechnical: Complete final report
- Roadway:
  - Begin development of preliminary design drawings, including storm drainage, construction phase sequencing, and maintenance of traffic
  - Begin design of intersection improvements at Camden Crossing
- ROW: Begin title work for affected parcels
