The Xtra Add-On is an optional upgrade that enhances your REVEAL experience by providing Tactacam

- Unlimited remote downloads of HD photos, videos, and on-demand photos
- TactaColor for full-color low-light nighttime photos
- Enhanced mapping features, including property boundaries, owner information, acreage, and public access
- Multi-shot photo delivery
- Hunt Radar

To activate Xtra, ensure you're using app version 3.3 or higher. Once activated, Xtra renews automatically on a monthly basis. You can cancel at any time through the app settings.

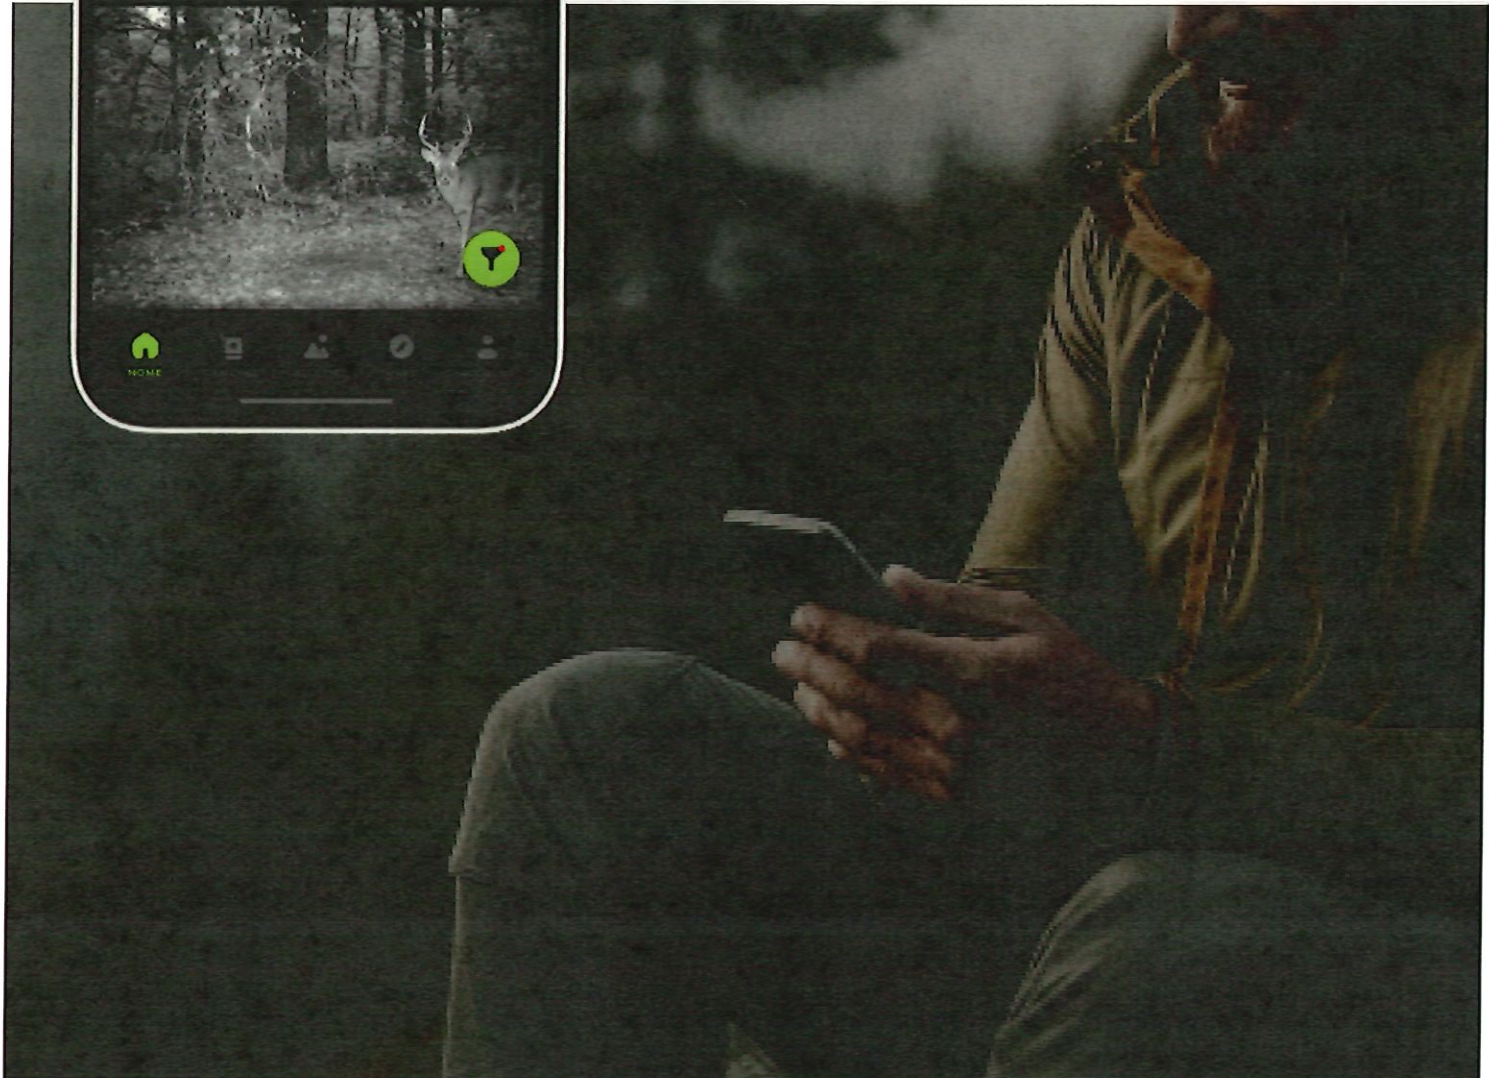

## **Service Connected to All Major Cellular Networks**

Data service independent of your phone service or carrier

## **App Features**

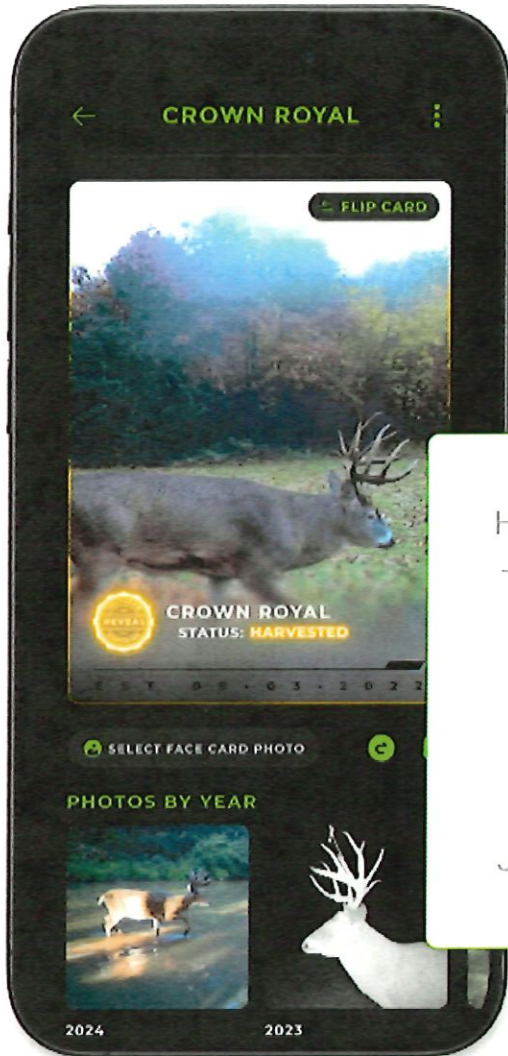

An app built by hunters, for hunters

- + **Features to enhance your wildlife scouting**
- + **Powerful mapping tools to help you plan your next hunt with ease and accuracy**
- + **Camera quality that leads the pack**
- + **Easily organize your photos for quick access**

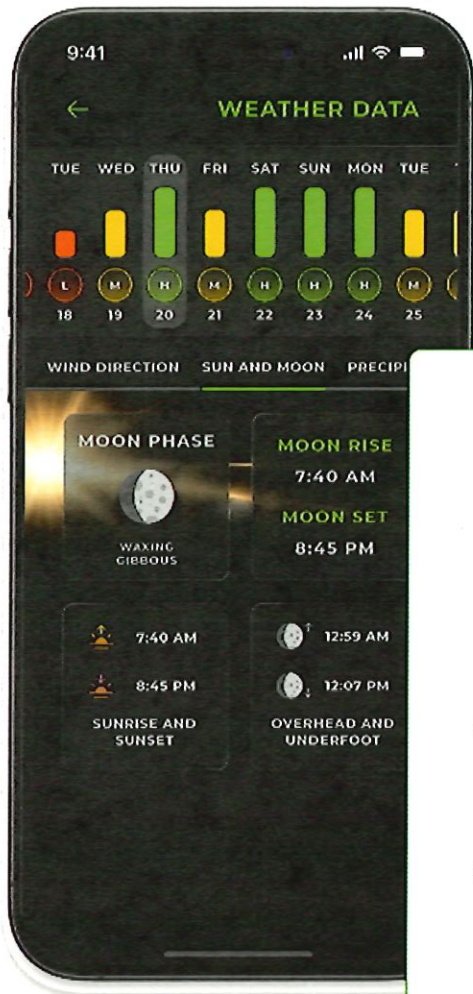

**Hunt Radar is Here**

## The Only Deer Forecast Backed by Billions of Real Photos

Hunt Radar is now live in the REVEAL app – and it's changing the way hunters plan their sits. Built from billions of daylight deer photos captured by REVEAL cams, this AI-powered tool predicts peak activity days up to 10 days out, right down to your zip code. No guesswork. Just smarter decisions, backed by proof.

While other hunting apps rely on generic weather patterns and assumptions, Hunt Radar goes deeper — analyzing real, daylight deer movement captured by REVEAL cellular cameras. Our AI filters out noise like nighttime photos and non-deer triggers, delivering clean, hyper-local deer activity predictions up to 10 days out. It's the only tool built on billions of actual deer photos, giving you confidence that your sit isn't based on theory — it's based on proof.

See the action as it happens, no matter where you are
