

7/13/2026

Ronny Lott
Madison County Chancery Clerk
Canton, MS 39046

Dear Ronny,

We sincerely appreciate the opportunity to continue serving your office and supporting your technology needs. At Alliance, we remain committed to providing reliable software solutions, website management, technical support, and dependable customer service to clerk's offices.

Over the past several years, the cost of maintaining and securing modern technology systems has increased significantly. Rising inflation, increased cybersecurity requirements, expanded data backup and disaster recovery services (where applicable), software development, training, and ongoing investments in system enhancements and security have all contributed to higher operational costs.

In order to maintain the level of service, security, and support your office expectations, we will be implementing an increase of fees effective 10/1/2026. This adjustment allows us to continue enhancing our services, maintaining secure backup systems (where applicable), providing software updates, and delivering the responsive support your office depends upon.

We value our partnership with your office and remain dedicated to providing dependable technology solutions tailored specifically for local government operations. If you have any questions regarding this adjustment, please feel free to contact us at any time.

Thank you again for your continued trust and partnership.

Sincerely,

Alex Griffith
Vice President
Alliance Renewable Technologies
