20th August 2026

To Whom It May Concern,

I am the treating physician for Vickie Washington, who currently resides in Madison MS. I am writing to document and support her request to place a manufactured home on her property due to significant medical hardship.

Vickie is diagnosed with idiopathic intracranial hypertension and chronic migraines. This condition requires frequent monitoring, specialty care, and regular assistance with activities of living. Due to these needs, it is medically necessary for Vickie to reside in close proximity to her family members who are able to provide daily support and immediate assistance.

Relocation to a manufactured home on her own property, nearer to family, will greatly contribute to her safety, well-being, and quality of life. It will ensure a supportive environment and allow for timely interventions, which can help prevent health complications and hospitalizations.

Given these circumstances, I respectfully urge the zoning department to consider this a genuine medical hardship and to approve Vickie Washington's request for permission to place a manufactured home on the property.

If you require further information please do not hesitate to contact me at Kfreeman@mscareclinic.com

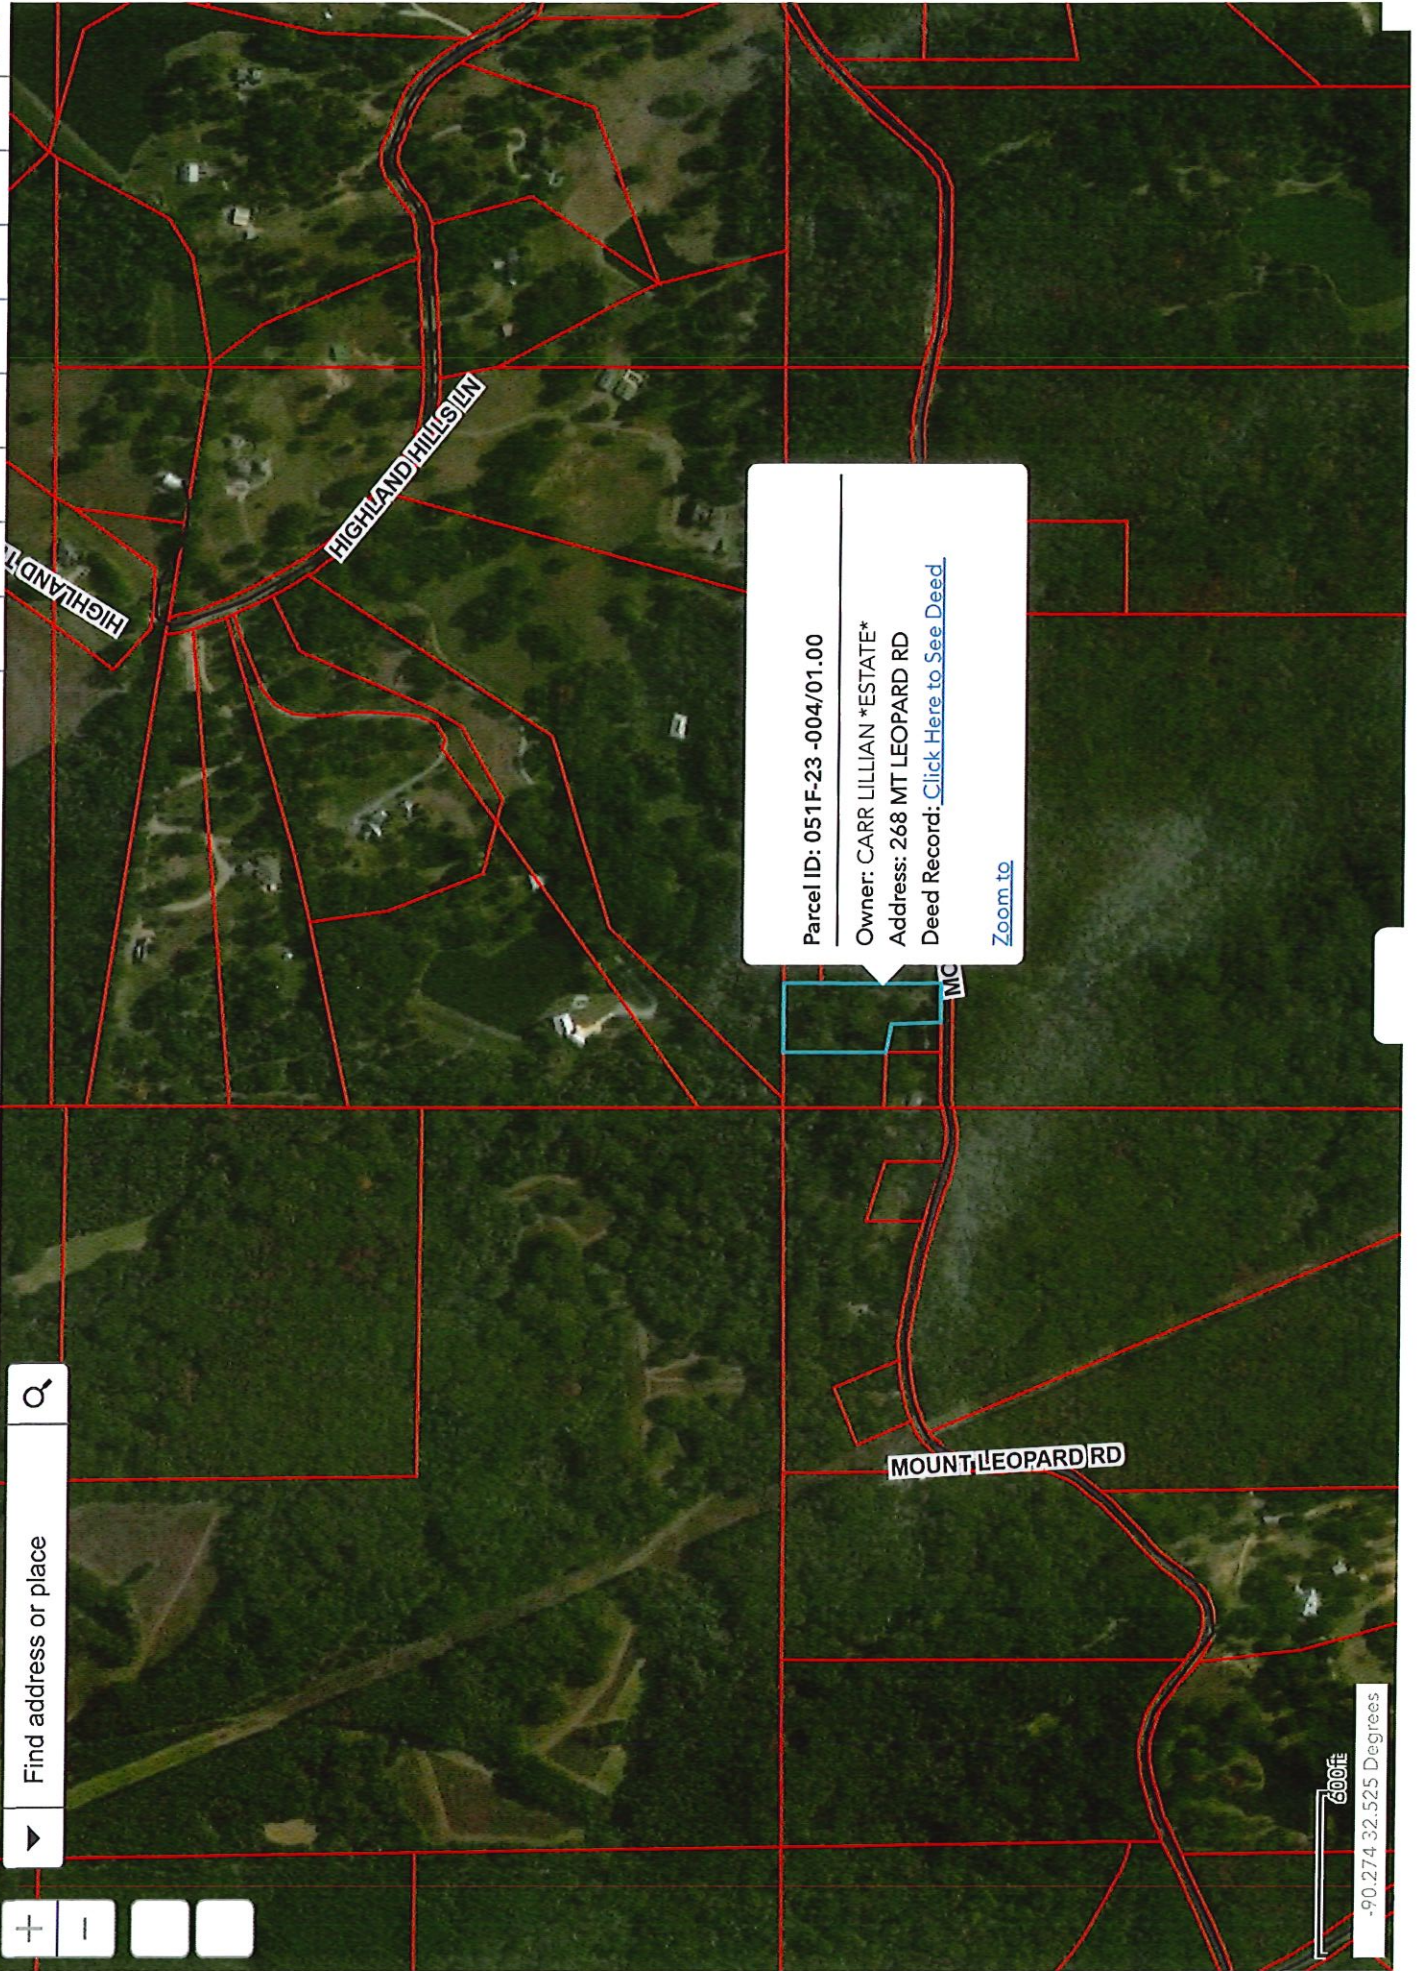

Sincerely,

A handwritten signature in black ink, appearing to read 'Karen Freeman FNP-C', with a stylized flourish at the end.

Karen Freeman FNP-C, AQH
