RE: Request for road closure on Holmes Ave.

Dear Supervisors;

CMU request permission to close Holmes Ave. from King Ranch Rd. to Davis Ave. of traffic to begin utility work installing a new Pump Station to replace existing Pump Station. No homes or driveways will be directly affected by this closure. The work will begin on or near September 1st 2014, for an estimated three week period mostly based on weather conditions. Work to be completed as soon as possible. CMU will submit a public service announcement to WMGO the week prior to and during construction to notify area residents as to the detour route they will need to use while work is under way.

We are requesting the County Road Dept. supply the large lane barriers and cones if possible. CMU appreciates the assistance of the County Road Dept.

Sincerely,

Don Holtsinger
Engineer Coordinator
