Re: Revised Dinkins St. Bridge Replacement

As we discussed, CMU's scope of work will be to extend the ductile iron piping on each side of the bridge for 20 feet as shown on attached drawing. The ductile pipe will replace the existing 10" clay pipe gravity lines. CMU will fill and compact up to the existing paving in order for the bridge contractor to begin work. The cost estimate for this work to be done is about \$22,500.00.

CMU will relocate the 8" water line on the south side of bridge and lower line 3 feet below the bottom of the creek as per our conversation. The cost estimate for this work will be \$27,000.00.

Let me know if I can be of further assistance.

Sincerely,

Larry Feduccia  
Engineering Service Manager
