Road Claim incident Report

Personal Information:

November 4, 2014

Larry L. Johnson; 334 Dover Lane, Madison, MS 39110

Contact number is 601 946 9081

Vehicle; Toyota Avalon

Incident Information:

Date: October 30, 2014 Time: 6:35 p.m.

Location: Stribling Road

Landmarks: The pothole was about 1.2 miles from highway 463 driving east on the right hand side of the road.

Speed of car: about 45 to 50 miles per hour.

Direction of travel: East

Cause of accident: Car went thru a pot hole.

Area of Vehicle damaged: It cut and then blew out the right rear tire.

Incident Summary:

I was driving along Stribling Road on my way to a meeting when I hit several potholes and I started hearing a funny sound coming from the rear of my car, then I started smelling what seemed to be rubber burning. I was near the Fire Station on Stribling Road so I pulled off into their parking area and inspected the tire. I saw that it had a big cut and hole on the outside of the tire. The two firemen assisted me and we changed the tire, putting on the spare. I then drove to my meeting, arriving late. I had to pick up my wife from the airport the next morning after which we were going to drive to Oxford for a family meeting, so I had to get the tire changed and ready for road travel. I made an appointment with Upton Tire Company in Madison for the next morning, Friday, to get repairs. I do all my business with Upton. I then called your office on Monday and was told to call back on Tuesday, which I did. I am attaching the receipt for the expense of replacing the tire and for the cost of the labor involved. Please call me if I can answer any more questions. Larry L Johnson

1/6/14 -
Spoke with Mr Johnson & told him we needed a 2nd
quote for the claim. He said he'd try & get that over today.

Michelin Primacy MXM4

Michelin Primacy MXM4 Tires are made for all season comfort, control, and cash savings at the gas pump. This luxury performance tire incorporates a European design sport handling profile with a more rounded shoulder for better handling and control. Variable width and depth tread grooves provide exceptional road grip in all season conditions. Michelin Comfort Control Technology improves the tire's response to the road for comfort and reduced noise, and also improves rolling resistance for fuel efficiency.

SPECIAL NOTES	

Features

- * Enjoy every curve
- * Confident wet and snow weather handling
- * Quiet, comfortable, fuel-efficient

Benefits

- * A European handling profile, featuring a rounder shoulder, is designed to provide progressive, predictable cornering, letting you push your vehicle to the edges of its performance capabilities
- * 2-D Active Sipes, which are both variable-width and full-depth, create biting edges to help give you more confidence in rain or snow
- * Michelin Comfort Control Technology uses

computer-optimized design and precision manufacturing to offer greatly reduced vibrations and road noise while meeting Michelin Green X standard for energy efficiency with reduced CO2 emissions.
